Team 2: Sidharth Babu, Tianda Huang

Category to compete: FoM

Most notable result:

Test accuracy [%]	# parameters	Max. memory [MB]	Avg. latency/image [ms]	Max. power [W]	Avg. energy/image [mJ]	FoM
70.21%	3,904	19.91	1.52	6.37	21.92	21139.26

Most important lessons learned:

- Neural Architecture Search is the way of the future
- Neural Architectures must be designed with target hardware platforms in mind
- Resource contention is a major issue on edge devices
